Nucleus<sup>®</sup>

Redefining inventory management

Nucleus is the premier inventory management solution designed to lower carrying costs, automate ordering, and deliver precise billing accuracy.

**Whether your practice needs the security of Nucleus stations, the flexibility of web-based inventory management, or a combination of both, Nucleus has evolved to support practices of all shapes and sizes.**

**With Nucleus, you can efficiently handle the purchase, storage, and dispense of essential medications through our secure, web-based portal, while our Nucleus stations remain a trusted option for practices also requiring secure, physical inventory management storage.**

---

“We quickly realized that we had a major opportunity to really tighten our inventory... I think for any practice that wants to be successful, on-time inventory is really important... Nucleus really changed everything for us in a positive way.”

- Director of Pharmacy, multi-specialty practice in the South

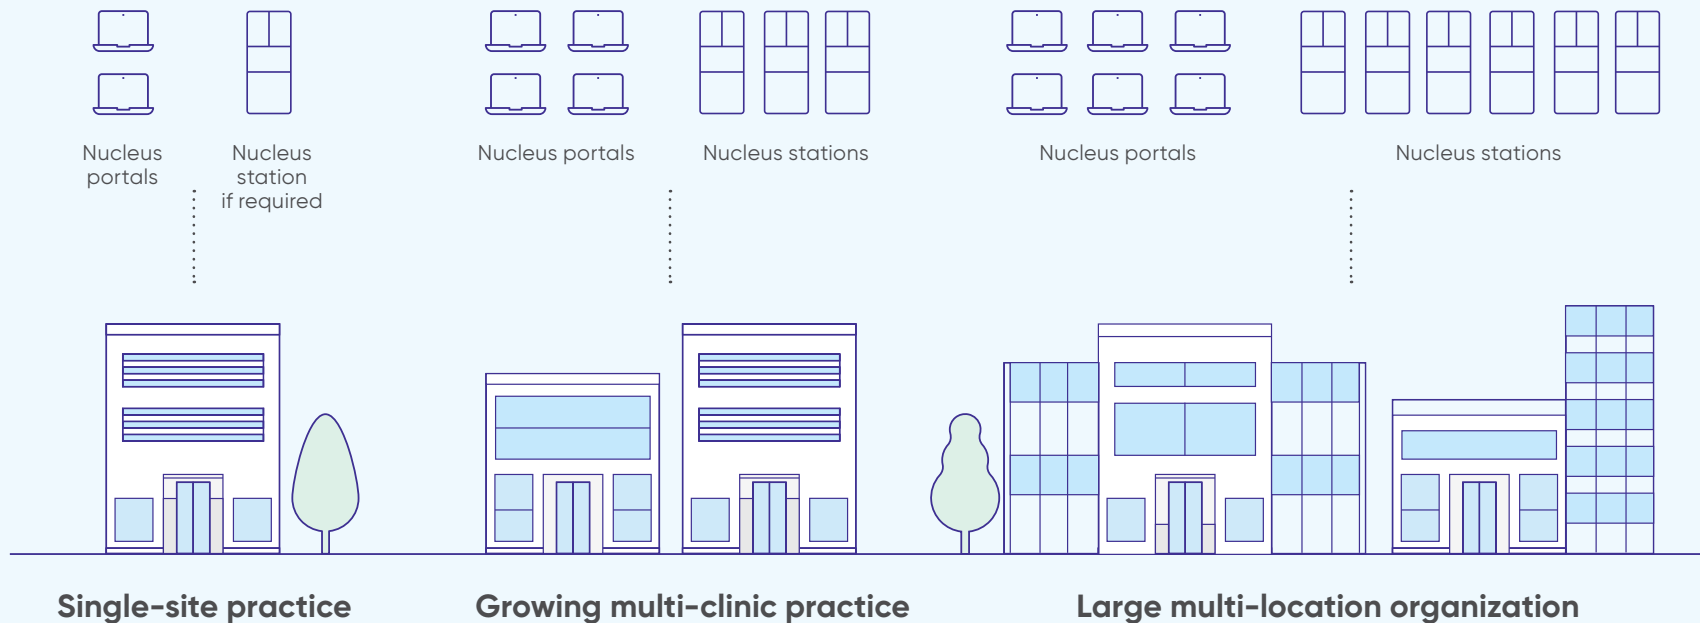

# Flexible inventory management designed to work the way you do

You can manage essential inventory tasks – stocking, dispensing, transferring, and auditing – from any computer in your clinic via the Nucleus portal. No special hardware is required, making it easier than ever to streamline your workflows.

- Manage non-secured inventory from any computer in your clinic
- Perform critical tasks like purchasing, receiving, dispensing, and auditing with ease
- Add new storage areas to Nucleus in just a few clicks, making it easy to adapt to your practice's current and future needs

Whether you're managing inventory in a single location or across multiple sites, Nucleus gives you the freedom to create workflows that fit your space and schedule. Use Nucleus stations where they make sense – like your main office – and the Nucleus portal in locations where space or staffing is limited, such as satellite clinics.

**Whatever the size of your organization, we design, implement, and support the right configuration to help your business thrive.**

## Hardware that fits your workflow

Your existing fridges and cabinets can be represented in the Nucleus portal, with inventory tracked in and out of each. If you do need hardware, we offer flexible options to suit your practice size and workflows.

### Secure, physical inventory control with Nucleus stations

- Fully integrated Nucleus hardware and software
- Hardwired remote locks for maximum security
- Configurable storage options: add extra units for more storage space, even incorporate your own dorm-size refrigerator

### Control and accuracy with Nucleus barcode scanning

- Scan product barcodes using the Nucleus scanner—no manual data entry required
- Capture critical product details, including lot numbers and expiration dates
- Enable consistent and accurate data capture with a single scan

### Product labeling and documentation with Nucleus printers

# At the center of your practice

Healthcare doesn't stand still – and neither should your inventory management. We continually update Nucleus with capabilities built for how your teams work today and how your organization leads and grows.

## For financial management

**Nucleus helps you right-size inventory investment and improve revenue capture with more accurate inventory and usage data than manual tracking can provide.**

- Reduce on-hand inventory and carrying costs while improving billing accuracy
- Identify unused product, unaccounted stock, and slow-moving items
- Prevent expiration-related write-offs with clear visibility into aging inventory
- Automatically calculate waste of single-dose vials

## For practice operations

**Nucleus simplifies multi-location inventory operations with scan-based workflows that reduce reliance on spreadsheets and manual tracking.**

- Capture key product details (lot and expiration) with a single barcode scan
- Track inventory movement across your locations to keep records accurate
- Optionally require dual confirmation for controlled substances to support compliance

## For purchasing

**Nucleus streamlines purchasing end to end, from identifying what to order, to receiving shipments and getting products into inventory.**

- Automatically capture shipped quantities, lot numbers, and expiration dates at receiving
- Build purchase orders from planned treatments and on-hand inventory (compatible EMR required)
- Route orders through multi-tier approvals to align with your authorization structure

## For clinical teams

**Nucleus gives clinical staff fast access to the patient and inventory details they need to treat safely and document accurately.**

- View patient history and critical safety details in the patient history screen
- Match medication orders to inventory to help staff pick the correct item at treatment
- Capture dispense details as part of the workflow to reduce manual documentation

The Nucleus logo is a central graphic consisting of two concentric circles, an outer light blue one and an inner white one. The word "Nucleus" with a registered trademark symbol is centered within the white circle. Lines radiate from the logo to connect it to the four surrounding text blocks.

Nucleus®

## For executive leadership

Medication inventory is significant working capital sitting on shelves – Nucleus helps you actively manage that investment with enterprise-wide visibility into inventory, utilization, and dispensing performance across all locations.

It provides a standardized operating framework that reduces site-to-site variability, strengthens financial controls, and protects margin, with real-time exception reporting and consolidated analytics to surface risk early and support governance as you grow.

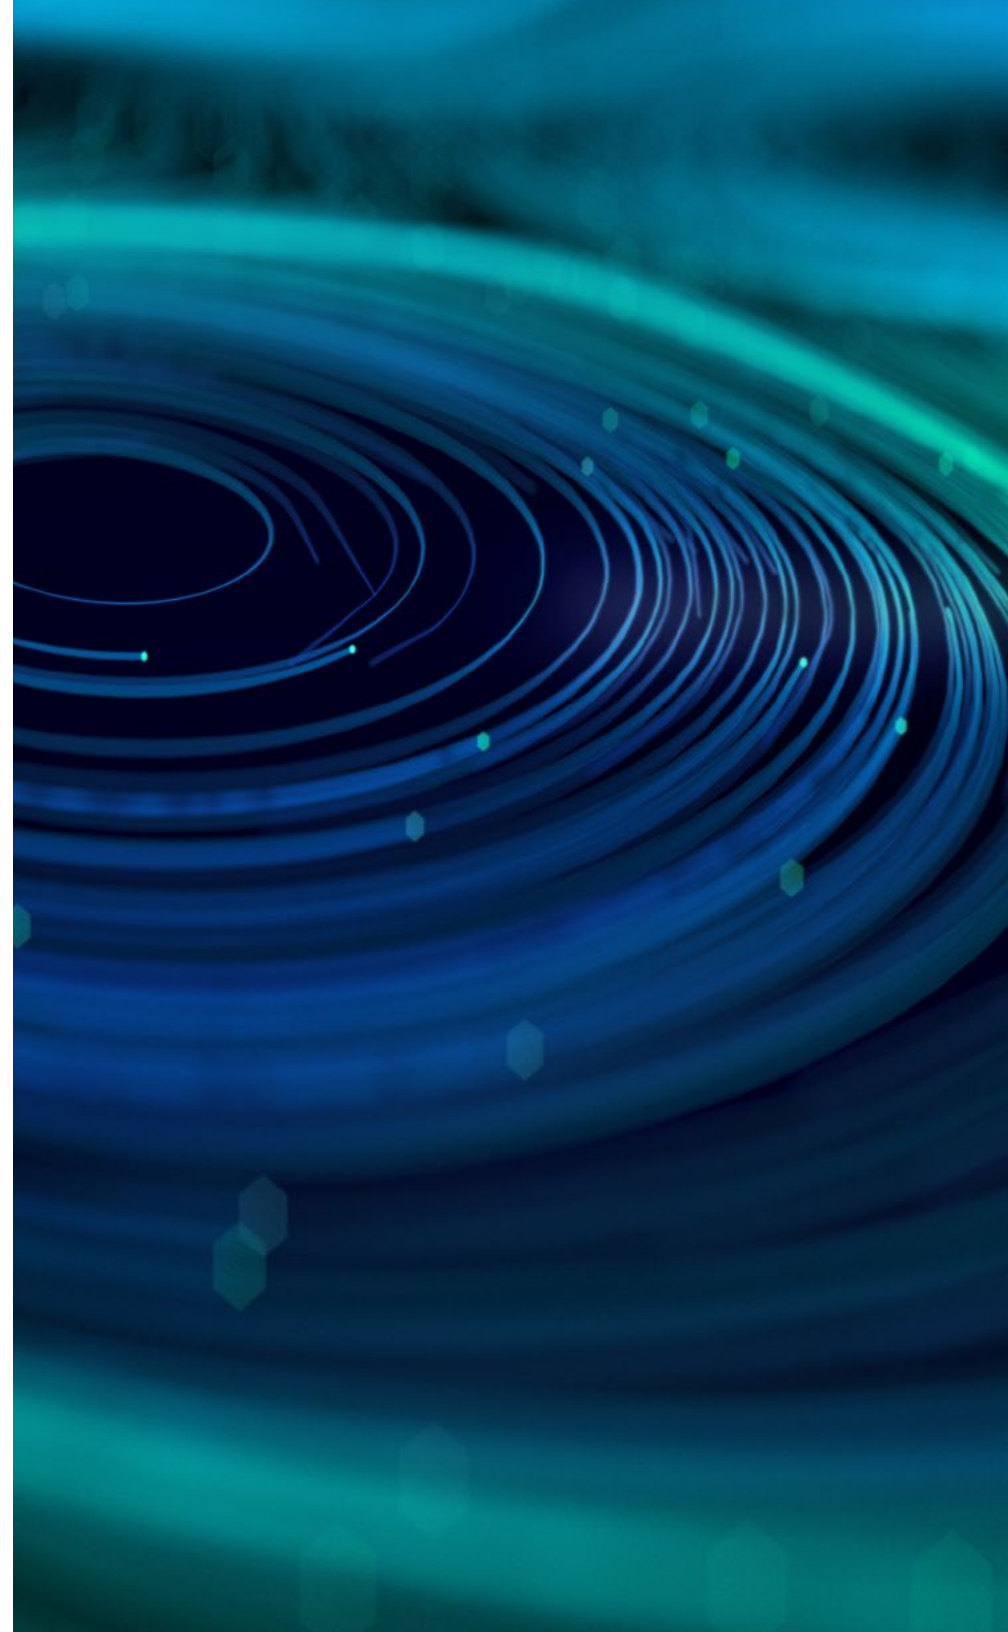

● **Enterprise standardization:** A consistent inventory operating model across clinics, service lines, and regions.

● **Margin protection:** Reduced waste, improved purchasing discipline, and stronger control of high-value medications.

● **Risk mitigation:** Early detection of inventory discrepancies, compliance gaps, and abnormal utilization patterns.

● **Scalable infrastructure:** A repeatable system that supports expansion without adding operational complexity.

● **Executive visibility:** Consolidated reporting that turns site-level activity into enterprise-level insight.
