9	Apr 2025	2025 CMS QRDA III Implementation Guide for Eligible Clinicians (Updated December 2024)

Background on Standards Version Advancement Process (SVAP)

The Standards Version Advancement Process (SVAP) permits health IT developers to voluntarily update health IT products certified under the ONC Health IT Certification Program (Certification Program) to newer versions of adopted standards as part of the “Real World Testing” Condition and Maintenance of Certification requirement (§ 170.405) of the 21st Century Cures Act.

Using SVAP, Certified Health IT developers are permitted to voluntarily use a newer approved version of a standard that is adopted in regulation. Currently, this flexibility is limited to standards that are adopted in the certification criteria required to meet the “Real World Testing” Condition of Certification, which include § 170.315(b), (c)(1) through (c)(3), (e)(1), (f), (g)(7) through (g)(10), and (h).

This document serves as UroChart’s advanced notice when utilizing SVAP to deliver updated Standards. We will ensure our customers are notified of this update through the appropriate customer-facing channels.

November 2025

Product	UroChart v9.1
Plan	UroChart plans to update to the CMS required 2025 standards for reporting year 2026.
Timeline	April 2026
Standard (and version)	2026 CMS QRDA III Implementation Guide for Eligible Clinicians (Updated July 2026)

Updated Cert. Criteria	170.315(c)(3)
Product Functionality	QRDA export
SVAP Approved	2025
Interoperability Impact	None

September 2025

Product	UroChart v9
Plan	UroChart plans to update to the CMS required 2026 USCDI and CDA standards that will be required beginning January 1, 2026.
Timeline	December 2025
